

BEGINNING BLENDER

Package Information

There are **6 .blend** files in this full lecture course package.

Part 1 – 3: The UI, Modelling, Sculpting

Part 4 – 6: Rigging, Animation, UV Unwrapping

Part 7 – 9: Texturing, Materials & Shading, Lighting

Part 10: The Final Project (Part 1)

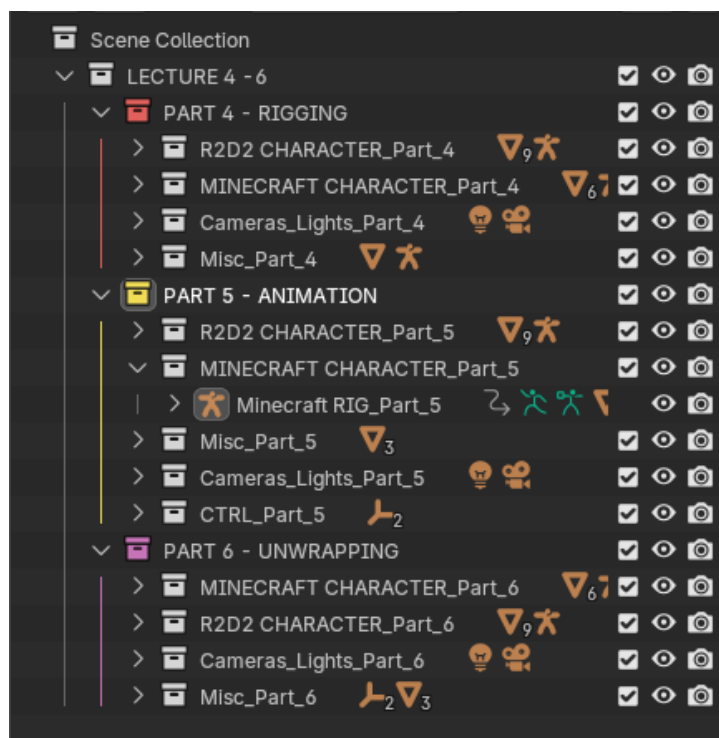

Part 11: The Final Project (Part 2)

Part 12: The Final Project (Part 3)

This package is ideal for anyone wanting to learn about **Blender** whilst following along with the **lectures** – they are a great way for people to actually explore the files and **reverse engineer** what has been created by exploring the models, rigs and animations as well as the various modifiers, relationships and file structure etc of a typical 3D Blender file.

Using the Files

Each file relates to the lecture content. The first 3 .blend files contain all the model and rigs relating to lectures 1 – 9. Each Lecture is contained in a folder as in the image below:

It is advisable to follow along with the lectures with the file open so you can explore to topics deeper. It is also highly recommended to use the PDF files which are rich in content and offer some great information to further your knowledge in Blender and 3D. The final 3 lectures are in separate files as they contain more data.

Other Resources

There are various other resources available in the product files. These are the audio files, modelling images, video reference and lecture notes.

Rendering

Cameras and lights have been set up for each file and hitting F12 will provide a basic render of each of the Blender scene files.
